

VIZIT^{sp} Installation Guide

Installation Requirements

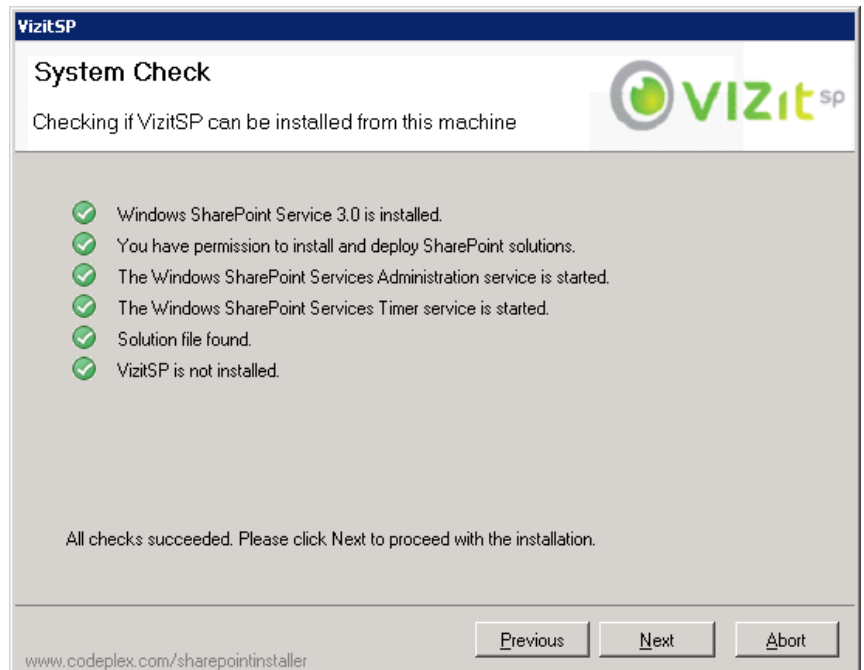

- Windows Server 2003 or Windows Server 2008, 32-bit or 64-bit architectures
- Windows SharePoint Services 3.0 (WSS 3.0) or Microsoft Office SharePoint Server 2007 (MOSS 2007)
- SharePoint Server Farm Administrator Access

The Vizit Installer

1. Copy the VizitSP Installer to any SharePoint Web Front that is running the Central Administration Process. Launch the installer by double-clicking the icon. Click “Next” to begin.

2. The installer will perform a system check. If all is green, click “Next” to proceed.

5. Wait for VIZITSP to install – click “Next” when complete.

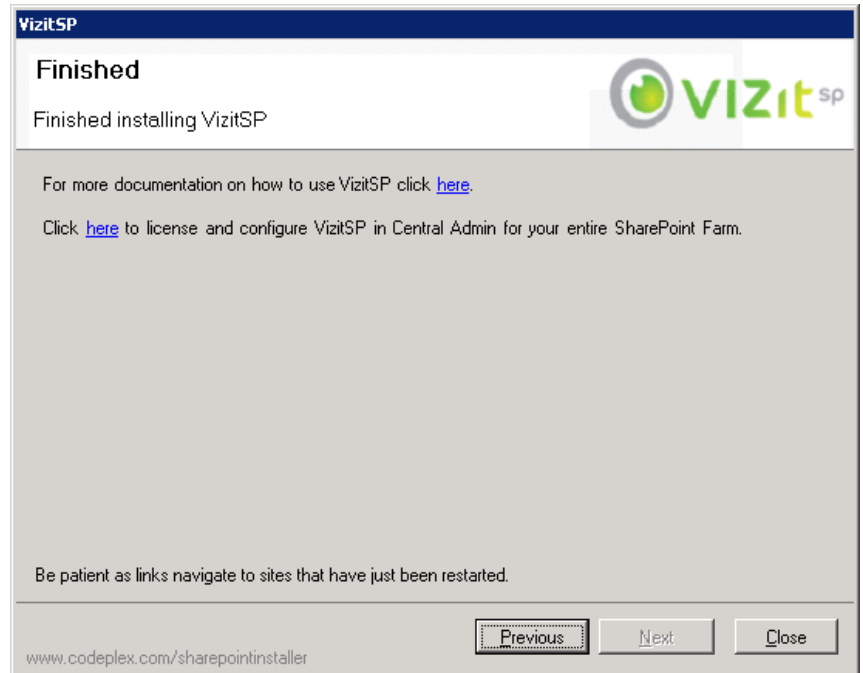

6. You will see a list of solution deployments and feature activations. Click “Next”.

VIZIT^{SP} Installation Guide

7. The final page will direct you to the website for more documentation, or to Central Administration in SharePoint to license and configure VIZITSP. Continue installation by clicking on the second link.

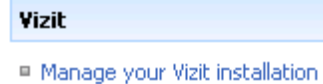

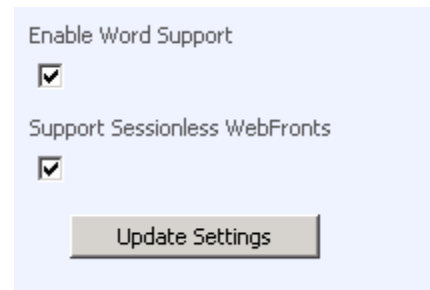

Vizit^{SP} Installation Guide

Inside SharePoint

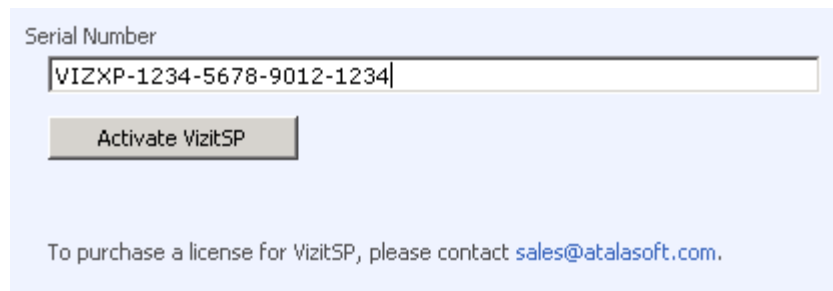

1. Navigate to the Application Management page inside Central Administration. Click on “Manage your Vizit Installation”.

2. The first two options are for enabling Word support and Sessionless WebFronts support. If you are running in a single server environment or have load balancing policies that provide sticky-sessions, you can uncheck the Support Sessionless Webfronts to increase performance. Click “Update Settings” to save your changes.

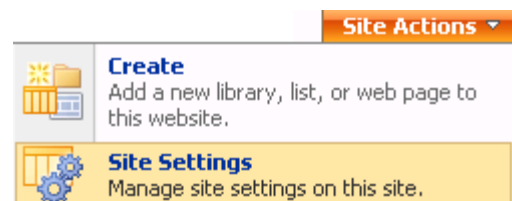

3. If you have a license for VizitSP, enter it in the box and click the “Activate VizitSP” button. If you do not have a license and wish to purchase one, contact an Atalasoftware Sales Representative at sales@atalasoftware.com.

4. If you would like to evaluate VizitSP, follow the links on the page to register and request a license. Once you have received the license file via email, navigate to it through the “Browse...” button on this page and click “Upload”.

5. Click “Done”. You will be taken to Application Management. Click on the “Site Settings” under the “Site Actions” tab.

- [Site collection features](#)
- [Site hierarchy](#)
- [Portal site connection](#)
- [Site collection audit settings](#)
- [Site collection policies](#)

7. Click on “Activate” to activate VizitSP.

Vizit

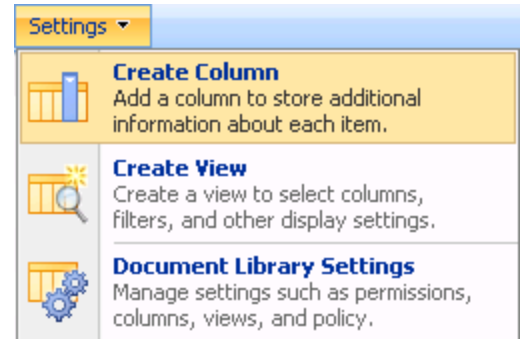

This feature creates the column/web.config entries and lists required for Vizit (VizitSP - www.vizitsp.com).

Activate

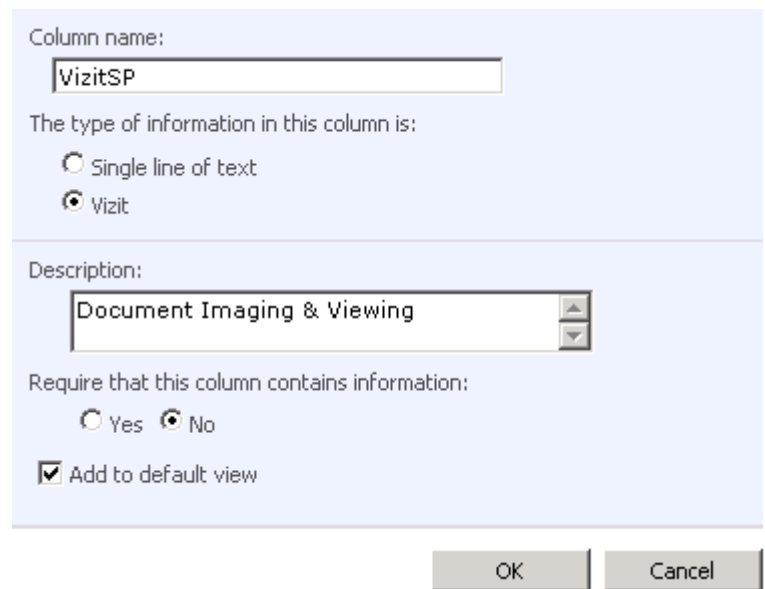

VIZIT^{SP} Installation Guide

Setting up VizitSP in the libraries

1. When in the Document Library in which you wish to use VizitSP, click on “Settings -> Create Column”

2. Enter a column name (such as “VizitSP”) and click the “Vizit” radio button. A description is not necessary, nor is requiring it to contain information. Click “OK” to save changes.

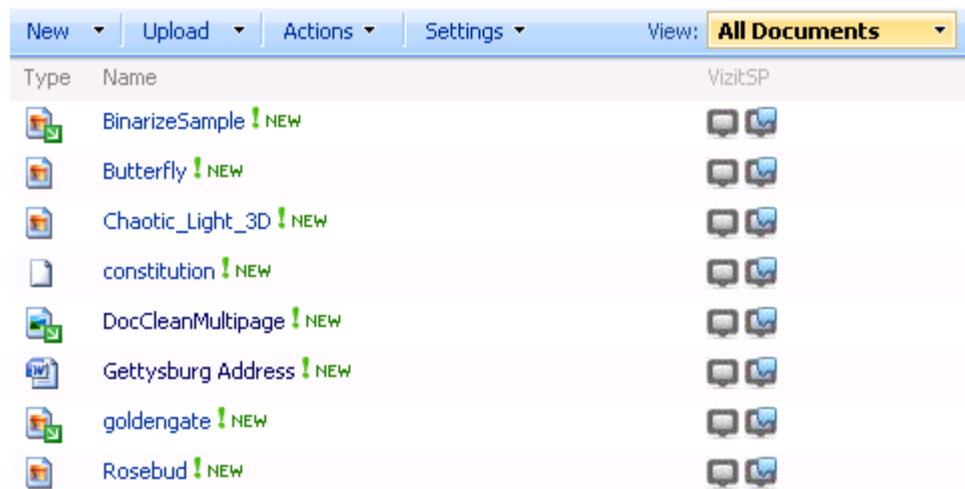

The dialog box shows the following fields and options:

- Column name:
- The type of information in this column is:
 - Single line of text
 - Vizit
- Description:
- Require that this column contains information:
 - Yes
 - No
- Add to default view

Buttons: OK, Cancel

3. A new column will show containing the two VizitSP icons. You are now ready to use VizitSP Previewer and Viewer.
